Long Lines Unloaded in Onts Market Lower Prices Quarter of Cent-Provisions Dull and Narrow, Opening Ensy.

CHICAGO. May 19.—The news today was against wheat for a time, but the export sales later caused a recovery and the close was steady, July 'go lower, torn was weak, closing by lower for May and '42' or down for July. Oats closed 'go lower and rrovisions 50' by he higher.

Inly wheat opened unchanged to 'so higher at 11½ 21½ closel people buying because of steady cables, light northwestorn receipts and a caimer feeling over the Wall street situation. Snow's report, claiming previous high conditions to have been well maintained, struck the pit crowd as distinctly bearish and under the unloading laces the market worked off to 70 claiming the forenoon. The market, which had been fairly active, ruled dult for a time till reports of export sales alarmed a few shorts who in an effort to cover bid the market back to 71 gc. The close was steady, 'so lower, at 71 sc. Exporters reported 47 loads taken. Seaboard cleatances in wheat and flour were equal to 551,000 bu, while primary receipts aggregated 24,000 bu, against 319,000 bu, last year. Minneapolis and Duluth reported 176 cars, compared with 228 last week and 203 a year ago. Local receipts were 57 cars, one of contract grade. Argentine shipments were 944,000 bu, according to a cable to the Board of Trade.

Corn prices received a rather severe drub-

Trade. Corn prices received a rather severe drub-Corn prices received a rather severe drubbing as the day's news was scatcely reassuring. Argentine shipments were 1,000,000 bu. last week, double the quantity of the previous week, while out of local receipts of 328 cars se contained No. 2 corn. The chief blow came in the illinois crop report, which claimed that \$3,100,000 bu. of corn still remained in farmers' hands, this being 15,000,000 bu. more than was held May I a vear ago. An influential trader dumped 2,000,000 bu. of July into the pit and scattered lots of corn held on small margins were also unloaded. The bull lender furnished about the only defense the price had and probably checked a greater decline than actually took place. July opened at 4544, sold down to 445,004,000 and closed \$400 under yesterday at 445,000 c. The main deal, as usual, was neglected, but prices eased off, the close being H₂C lower at 514C.

Oats were moderately active, but feature-less. Commission houses were on both sides of the fence, but as finally long lines were relinquished and the surrounding influences were not clevating, the price level subsided fractionally. July sold between 27%c and 27%c27%c and closed %c down at 27%c. Receipts were 186 cars.

Frovisions were dull and the price range narrow. The opening was easy in sympathy with lower prices at the yards, but a demand for September lard steadied the whole list later. July pork closed 7%c higher at \$14.77%. July lard 5c higher at \$1.52%c and July ribs 5c better at \$5.87%c.

Estimated receipts tomorrow: Wheat, 115 cars; corn, 250 cars; oats, 185 cars; hogs, 16.000 head.

The leading futures ranged as follows:

71%0%	71%	70%	71160014	715,02%

COMMERCIAL AND FINANCIAL

after a slow trade all day. The rest of the list here exhibited general apathy and price changes were conspicuous by their absence. Copper was dull and unchanged at \$17 for Lake Superior and \$16.62 for cast-ling and electrolytic, while values scored a net rise of \$3 d in London, spot closing at \$69 los and futures at £70. Lead was inactive and unchanged here. In London, however, a loss of is 3d was secured, closing easy at £12 3s 9d. Spelter was also dull and nominally unchanged at \$3.8594.00. Iron markets were without important feature and prices ruled more or less nominal in the absence of business. Glasgow, 45s 5d; Middleborough, 46s.

TRADE REMAINS UNSHAKEN

General Conditions Never More Sound, Despite Wall Street Tempest.

CEREAL QUOTATIONS SLOW TO RECEDE

Western Corn Operators Little Daunted by Midland Increase of Receipts, Due to the Higher Prices Offered.

NEW YORK, May 10 .-- R. G. Dun & Co.'s NEW YORK, May 10.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say:

A panic in Wall street does not mean that legitimate business his suddenly ceased to prosper, nor is the condition of mercantile trade and manutacture adversely affected by a violent tall in prices of securities. Throughout the entire country fundamental conditions were never so sound as at the present time, reports from nearly every city this week showing an exceptional volume of transactions and payments promptly met.

Production is not overtaking aemand at the finished steel mills and all Pittsburg plants are two months behind orders, while ninety days is the limit at many. Although the expected advance in bar fron did not appear the tone continues firm and orders are liberal Prices remain at the top point for prompt delivery, but reasonable terms are available on forward contracts. In structural shapes and railway equipment there is all the business in sight that makers desire, and no effort is made to secure additional orders. Less urgency is recorded in pig fron markets, but buyers do not find terms more satisfactory, and, in fact, forge and foundry fron is rather more firmly held. Although the total number of furnaces in blast on May I was fortly smaller than on February 1, 1900, the fron Age estimates the weekly capacity at 191,125 gtons, which exceeds all previous high water marks. The activity of steel manutacturing is emphasized by the decrease of 33,729 tons in furnace stocks during April, despite the unparalleled production.

Cereals Are Obstinate. Weekly Review of Trade tomorrow will say

Less sensational events transpired in the cereal markets than in the preceding week, although quotations are slow to recede. Corn eased off a few cents, but is still about 10c a bushel, or nearly 25 per cent, above the quotation at the corresponding date in the two preceding years. Western operators continue to entertain strong views and appear little daunted by the larger receipts attracted to interior cities by the unusually profitable prices offered. For the week arrivals aggregated 3,247,694 bu, against 2,196,302 bu, last year. Foreign purchasers have been driven out of the domestic markets by the high quotations and Atlantic exports for the week have been 1,121,244 bu., compared with 3,763,880 bu, a year ago. Cerents Are Obstinate.

the country in any way. There will not, in fact, be a bushel of wheat or a ton of coal less in the country as a result of this constant of the country as a result of this constant of the country as a result of this constant of the country as a result of this constant of the country as a result of this constant of the concentration of interest upon the stock market.

General, trade addices this week are, in the main reather more favorable han those the main reather more properties and the summary of the main reather more properties and the summary of the main reather more properties and the summary of the main reather more properties and the summary of the main reather more properties and the summary of the main reather more properties and the summary of the sum

summer months, in view of the general fear of manipulation in case prevailing on the providing of the manipulation in case prevailing of the month is supplies to be carried over miterialize.

New business is less notable in iron and steel than for some time past, but prices are steady and firm at last week's quotations, with mills and furnaces running to their full capacity. The pig iron output on the first of the month is said to be the largest in the country's history, exceeding the boom of February, 1900. New business is small in rails, but inquiries are numerous. Large consumers of pig iron in the Chicago & Alton Large consumers of pig iron in the Chicago & Alton Chicago & Alton Mosking Valley and pid.

Corn has lost strength with the other grains but the manipulation at Chicago is still the feature, and the strength of the market is said to be due to extensive buying by agricultural interests.

Oats are higher on less favorable crop reports and the fear of manipulation of corn and oats in the summer months is a very real one. Russian wheat crop reports are lessed and shoe trade are in a high degree encouraging. Orders for fall delivery of boots and shoes are in creasing and manufacturers are active.

Wheat, including flour, shipments for the week aggregate 4,178,712 bushels, against 5,100,783 last week, 3,80,574 in the corresponding week of 1980, 3,234,185 bushels in 1893 and 3,648,534 bushels in this week a year ago, 126 in 1896, and 1899 and 250 in 1898.

From July 1 to date this season corn exports are 188,599,287 bushels against 17,841,215 bushels last season and 146,278,801 bushels in 1898, 99.

Failures for the week number 193, as compared with 183 last week, 19 in this week a year ago, 126 in 1899 and 250 in 1898.

Canadian failures for the week number 26, against 17 last week, 19 in this week a year ago, 21 in 1899, 25 in 1898 and 31 in 197.

compared with 163 last week, 174 in this week a year ago, 169 in 1839 and 250 in 1838. Canadian failures for the week number 26, against 17 last week, 19 in this week a year ago, 21 in 1839, 25 in 1838 and 31 in 197.

BRADSTREET'S FINANCIAL REVIEW.

Output of Pig Iron May I Largest in History of Country.

NEW YORK, May 10.—Bradstreet's Financial Review tomorrow will say:

Speculation on an unparalleled scale has at last resulted in a decline in prices of great severity, attended by sensational developments, although the market recovered sharply on Friday. The corner in Northern Pacific stock and the contest for the control of that property between the Union Pacific interests, represented by Kuhn,

Loch & Co., and the Morgan-Hill party, was the spected and inferescen. In fact, up to last Tuesday the street was more impressed by the idea that there was an effort on foot to obtain control of the Union Pacific for the Vanderbilt interest and the Northwestern and St. Paul systems than by the real danger with which it was confronted. The enormous trading in Union Pacific shares gave point to this theory, but on last Monday, when the dealings in Northern Pacific common stock rose to nearly seems shares for the day and the buying assumed a concentrated form the presence of some unusual factors was recognized. Even this, with the rise of the stock to 123, was at first demand to be a matter of secondary importance. But when Northern Pacific stock became scarce in the loan crowd and the rate of borrowing it was quoted dat or without interest and finally at a premium, as was the case on Tuesday, it was then understood that a collision between great refer ad and banking interests had taken place. The full significance of the situation was seen when Northern Pacific common soared to over 149 on Tuesday and the rate at which it could be borrowed over night was as high as 19 per cent for the par value.

pur value. MOVEMENTS IN STOCKS AND BONDS.

Considerable Headway Made in Recovering from Thursday's Effect.

NEW YORK, May 10.—Rapid progress was made in re-establishing conndence in Wail street today and there was a natural rebound in prices. That is to say, the fact of the rebound was very natural after the extent of the declines of yesterday, but the range of the recovery was surprising. Large progress was made toward wiping out the net losses which remained last night after the recovery had already set in on the exchange. In a number of stocks which were not acutely affected yesterday today's price rose above Wednesday's closing level and in Missouri Pacific yesterday's net loss was covered with three prints to spare, the extreme advance reaching fitteen points.

There was a good deal of trepidation still evident this morning, owing to the vague dread that there might be exchange houses which would be unable to meet their obligations after yesterday's drastic experience. The market was therefore unsettled and feverish, even after the strong opening, but when the official announcement was made that the clearing sheets of all the members of the Stock exchange lead gone through the Stock exchange clearing house perfectly and that all their checks had been honored, a feeling of relief was manifested and prices grew steadily throughout the day. During the latter part of the day there was a resumption of what looked like a speculative movement for the rise led by Union Pacific. The buoyancy of this stock and the accompanying strength of the Southwesterns was based upon rumors and assumptions of the benefits to accrue to Union Pacific from a change in control of Northern Pacific which was still stoutly claimed by the Union Pacific party.

Undoubtedly there were very many speculative losers of great resources in the colation party.

CATTLE-There was a fair run of cattle here today for the last end of the week and ouyers took hold in good shape and the market ruled active and just about steady market ruled active and just about steady all around.

As usual, beef steers made up the bulk of the receipts. Packers on the start tried to buy them a little lower, but sellers held on for steady prices and finally packers came to their terms. After the cattle began to change hands they went to the scales quite rapidly and anything at all desirable was soon out of first hands. It was a good active market, all things considered, and the prices paid were generally very satisfactory.

There were very few cows and heifers on sale this morning and the few that were offered were picked up in good season at practically yesterday's prices. The market soon came to a close for lack of cattle to sell. Bulls also were in good demand at steady prices and the same could be said steady prices and the same could be said of veal caives and stags.

The supply of stockers and feeders was not heavy today and no material change in the market was notleeable. Speculators evidently did not care for many and had the supply been large prices undoubtedly would have taken a tumble, but as it was there were not too many for buyers to take at steady prices. Common stuff, however, was very slow sale and, if anything, was lower. Representative sales:

Coffee Market.

NEW YORK, May 10.—COFFEE—Sp.st. Rio, duil; No. 7 invoice, 84c; Cordova, 84c; P. 124c. There was little change in the market today. The opening was steady, with prices unchanged to a points lower, news from Hamburg being disappointing and receipts at the Brazilian ports exceeding predictions. But there was little in the way of selling orders, while toward the close some covering and outside buying sent prices up 5 points. Trading was very quiet, with the room contingent constarrably mixed in its views. The market closed quiet and unchanged to 5 points higher. Sales were 12,500 bags, including: May, 5,56; June, 5,56; July, 5,45c; September, 5,569;5 No.

STATUS OF CROP CONDITIONS

terenge of Winter Wheat Under Cultivation Greater Than Last Year.

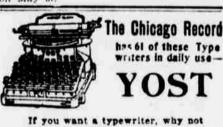

WASHINGTON, May 10.- Returns to the

WASHINGTON, May 16.—Returns to the statistician of 'he Department of Agriculture made up to May 1 show the acreage of winter wheat in cultivation on that date to have been about 28 287,000 acres. This is 2,015,000 acres, or 6.7 per cent less than the area sown last fall, but 2,032,000 acres, or 7.7 per cent in excess of the winter wheat aercage harvested last year. Of the reduction about one-half is reported from Texas and California, due in the former state to the ravages of the wheat plant louse and in the latter to the cutting, as is not unusual in that state, of a considerable acreage for forage. In the states that had 1,000,000 acres or upward sown last fail the following percentages are reported as abandoned or cut for forage.

Missouri, 1; Kansasa, 1; Illinois, 1,9; Pennsylvania, 2; Indiana, 2,5; Ohto, 3,2; Tennessee, 4,7; Michigan, 0,6; Oklahoma, 12,5; California, 1; Texas, 2,4.

For the area remaining under cultivation the average condition on May 1 was 94.1. While this average is 10.5 points above the mean of the May averages or the last ten years, and has been exceeded only three times in seventeen years, it must be remembered that the acreage plowed up, cut for forage or otherwise abandoned has been entirely eliminated. In Kansas the wheat crop has held its own at the high average—105—reported of 5 points in Pennsylvania, Ohlo and Indiana, 8 in Illinois and 4 in Missouri. On the other hand, notwithstanding the elimination in Texas and California of so much of the acreage as will not be harvested, a decline is noted amounting to 4 points in the former state and 14 in the latter.

The average condition of winter rye on May 1 was 94.5, as compared with 25.1 on April 1, 1991; 85.5 on May 1, 300; 82.2 at the corresponding date in 1829, and 89.2, the mean of the May averages of the last ten years. The present condition is the high-ar since 189. Pennsylvania and Now York, with two-fifths of the total winter rye acronage of the country, each report a condition of meadow mowing lands on May 1, was 94.5, agai
